

All cars must pull forward as far as possible in the parent pick-up zone, passing Door 9 while waiting for your student to exit the building. We are not permitted to have any cars standing on Ellsworth Lane, so it's essential that we stage vehicles on campus to keep traffic flowing. If the pick-up lane is full and cars are stopped on Ellsworth Lane, we need to utilize the second lane. In the second lane, please forward to the curve noted in the picture.

At the curve, we will implement a zipper merge. A zipper merge means that each car from the second lane should take turns merging with cars from the main pick-up lane, one by one, like the teeth of a zipper coming together. This method helps keep traffic moving smoothly and prevents backups.

All cars will exit either onto Standish (one-way, eastbound) or onto Ellsworth Lane, where right turns are required at the stop sign.
